**DETAILED ACTION**

***Oath/Declaration***

The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because:

Non-initialed and/or non-dated alterations have been made to the oath or declaration. See 37 CFR 1.52(c).

***Claim Objections***

Claims 4-5 and 8-23 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim should refer to other claims in the alternative only--, and/or --cannot depend from any other multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims have not been further treated on the merits.

Claims 6-7 are objected to because of the following informalities: Alternative expressions are permitted if they present no uncertainty or ambiguity with respect to the question of scope or clarity of the claims. One acceptable form of alternative expression, which is commonly referred to as a Markush group, recites members as being “selected from the group consisting of A, B and C.” See Ex parte Markush, 1925 C.D. 126 (Comm'r Pat. 1925) [See MPEP 2173.05(h)]. Appropriate correction is required.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 2-3 and 6-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

A broad range or limitation together with a narrow range or limitation that falls within the broad range or limitation (in the same claim) is considered indefinite, since the resulting claim does not clearly set forth the metes and bounds of the patent protection desired. See MPEP § 2173.05(c). Note the explanation given by the Board of Patent Appeals and Interferences in *Ex parte Wu*, 10 USPQ2d 2031, 2033 (Bd. Pat. App. & Inter. 1989), as to where broad language is followed by "such as" and then narrow language. The Board stated that this can render a claim indefinite by raising a question or doubt as to whether the feature introduced by such language is (a) merely exemplary of the remainder of the claim, and therefore not required, or (b) a required feature of the claims. Note also, for example, the decisions of *Ex parte Steigewald*, 131 USPQ 74 (Bd. App. 1961); *Ex parte Hall*, 83 USPQ 38 (Bd. App. 1948); and *Ex parte Hasche*, 86 USPQ 481 (Bd. App. 1949). In the present instance, claim 2 recites the broad recitation a functionality less than 5000, and the claim also recites a functionality less than 2000 or even less than 500 which is the narrower statement of the range/limitation.

In the present instance, claim 3 recites the broad recitation molecular mass ranging from 50 to  $10^5$  g/mol, and the claim also recites less than  $10^4$  g/mol which is the narrower statement of the range/limitation.

Regarding claims 6 and 7, the phrase "such as" renders the claim indefinite because it is unclear whether the limitations following the phrase are part of the claimed invention. See MPEP § 2173.05(d).

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 and 6-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Nigam (6,171,444).

Regarding claim 1: Nigam teaches a sizing composition (2:65-3:2; 7:42-64; 11:35-40) comprising a polycarboxylic acid (8:4-31; 8:54-67) and polyamine (8:32-53; 9:1-10).

Regarding claims 2-3: Nigam teaches polycarboxylic acids having a functionality of 3 {greater than 2 and less than 5000} [instant claim 2] (8:22-30; 8:54-67), specifically 1,2,4,5-benzene tetracarboxylic acid (mw = 254.15 g/mol) [instant claim 3] (8:27-28).

Regarding claims 6-7: Nigam teaches poly(acrylic acid) [instant claims 6-7] (8:57).

The prior art made of record and not relied upon is considered pertinent to applicants' disclosure. See attached form PTO-892.
